MORE DETAILS TO COME

WELLNESS THEME:

TURN OFF THE SCREEN AND GET MOVING!

Online safety is extremely important, and parents should be aware of what their children are doing online. Parents should learn about the apps and websites their children are using, set rules around technology, and communicate what is appropriate when using technology. It's also important to set limits on screen time. Encourage children to turn off the screens and choose activities that include physical activity. This can include sports, playing outside, chores, or any other activity that gets children moving.
